Good evening Mrs. Papamali and Professor Manolis, I hope you have both been well and healthy.

I have been informed to make some changes to my papers and I hope you may be able to make the changes for me: Please include this line on the bottom of each publication:

This work was supported by NIH T32 GM008685 Clinical Pharmacology Training Grant.

Also, I was requested to remove the following author: Richard M. Weinshilboum from this publication: “Electrophysiological Neuroimaging using sLORETA Comparing 22 Age Matched Male and Female Schizophrenia Patients”.

My apologies for this inconvenience.

Respectfully,
Andy Eugene

Good morning Mrs. Katerina Papamali and Professor Manolis,
I hope you have been well.

I have been informed to make some changes to my papers and I hope you may be able to make the changes for me.

May you please edit the articles to include this line on the bottom of each these 2 publications:

This work was supported by NIH T32 GM008685 Clinical Pharmacology Training Grant.

“The influences of nitric oxide, epinephrine, and dopamine on vascular tone: dose-response modeling and simulations.”

“Electrophysiological Neuroimaging Using sLORETA Comparing 22 Age-Matched Male and Female Schizophrenia Patients.”

Also, I was requested to remove the following author: Richard M. Weinshilboum from this publication: “Electrophysiological Neuroimaging Using sLORETA Comparing 22 Age-Matched Male and Female Schizophrenia Patients.”

Please forgive me for the inconvenience and feel free to contact me with any questions.

Respectfully,
Andy Eugene
